You could **save £106 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 15,287 kWh per year for heating
- 2,327 kWh per year for hot water

Impact on the environment
