Energy performance certificate (EPC)

Blaenige Blaenycod Road CARMARTHEN SA33 6EL	Energy rating E	Valid until: 13 July 2036
		Certificate number: 2041-5683-9060-5404-4091

Property type
Detached house

Total floor area
187 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is E. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone, as built, no insulation (assumed)	Poor
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 100 mm loft insulation	Average
Window	Partial double glazing	Very poor
Main heating	Boiler and radiators, oil	Average

Feature	Description	Rating
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Below average lighting efficiency	Average
Floor	Solid, no insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	Room heaters, wood logs	N/A

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Biomass secondary heating

Primary energy use

The primary energy use for this property per year is 224 kilowatt hours per square metre (kWh/m2).

► [About primary energy use](#)

Additional information

Additional information about this property:

- PV recommended
When considering the PV installation consider installing PV battery and a PV diverter for water heating.
- Dwelling may be exposed to wind-driven rain

Smart meters

This property had **no smart meters** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out how to get a smart meter \(https://www.smartenergygb.org/\)](https://www.smartenergygb.org/)

How this affects your energy bills

An average household would need to spend **£2,681 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £934 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2026** when this EPC was created. People living at the property may use different

amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 23,909 kWh per year for heating
- 4,281 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces

6 tonnes of CO₂

This property produces

9.3 tonnes of CO₂

This property's potential production

4.8 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm

Typical installation cost

£900 - £1,200

Typical yearly saving

£71

Potential rating after completing step 1

51 E

Step 2: Internal wall insulation

Typical installation cost

£7,500 - £11,000

Typical yearly saving

£380

Potential rating after completing steps 1 and 2

59 D

Step 3: Floor insulation (solid floor)

Typical installation cost

£5,000 - £10,000

Typical yearly saving

£123

Potential rating after completing steps 1 to 3

61 D

Step 4: Hot water cylinder insulation

Add additional 80 mm jacket to hot water cylinder

Typical installation cost

£20 - £40

Typical yearly saving

£35

Potential rating after completing steps 1 to 4

62 D

Step 5: Draught proofing

Typical installation cost

£150 - £250

Typical yearly saving

£62

Potential rating after completing steps 1 to 5

63 D

Step 6: Heating controls (room thermostat)

Typical installation cost

£220 - £250

Typical yearly saving

£93

Potential rating after completing steps 1 to 6

65 D

Step 7: Solar water heating

Typical installation cost

£4,000 - £7,000

Typical yearly saving

£53

Potential rating after completing steps 1 to 7**66 D****Step 8: Double glazed windows**

Replace single glazed windows with low-E double glazed windows

Typical installation cost

£4,500 - £6,000

Typical yearly saving

£116

Potential rating after completing steps 1 to 8**68 D****Step 9: Solar photovoltaic panels, 2.5 kWp****Typical installation cost**

£8,000 - £10,000

Typical yearly saving

£317

Potential rating after completing steps 1 to 9**74 C****Step 10: Wind turbine****Typical installation cost**

£5,000 - £20,000

Typical yearly saving

£989

Potential rating after completing steps 1 to 10

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name

Robin Gerard

Telephone

07796 424191

Email

dyfedenergy@gmail.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Quidos Limited

Assessor's ID

QUID200713

Telephone

01225 667 570

Email

info@quidos.co.uk

About this assessment

Assessor's declaration

No related party

Date of assessment
