

Energy performance certificate (EPC)

1 Nursery Lane CONGLETON CW12 3EX	Energy rating E	Valid until:	17 August 2036
		Certificate number:	6736-8528-9600-0908-5292

Property type	End-terrace house
Total floor area	86 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is E. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property’s current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property’s energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property’s age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, insulated (assumed)	Average
Window	Single glazed	Very poor

Feature	Description	Rating
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer and room thermostat	Average
Hot water	From main system	Average
Lighting	Below average lighting efficiency	Average
Floor	Solid, no insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	Portable electric heaters (assumed)	N/A

Primary energy use

The primary energy use for this property per year is 370 kilowatt hours per square metre (kWh/m²).

► [About primary energy use](#)

Additional information

Additional information about this property:

- Cavity fill is recommended

Smart meters

This property had **no smart meters** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out how to get a smart meter \(https://www.smartenergygb.org/\)](https://www.smartenergygb.org/)

How this affects your energy bills

An average household would need to spend **£2,505 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,369 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2026** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 15,295 kWh per year for heating
- 2,954 kWh per year for hot water

Impact on the environment

This property’s environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO2
This property produces	5.7 tonnes of CO2
This property’s potential production	2.6 tonnes of CO2

You could improve this property’s CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

Step 1: Cavity wall insulation

Typical installation cost	£900 - £1,500
---------------------------	---------------

Typical yearly saving	£342
-----------------------	------

Potential rating after completing step 1	51 E
--	------

Step 2: Internal wall insulation

Typical installation cost	£7,500 - £11,000
---------------------------	------------------

Typical yearly saving	£97
-----------------------	-----

Potential rating after completing steps 1 and 2	53 E
---	------

Step 3: Floor insulation (solid floor)

Typical installation cost	£5,000 - £10,000
---------------------------	------------------

Typical yearly saving	£124
-----------------------	------

Potential rating after completing steps 1 to 3	55 D
--	------

Step 4: Draught proofing

Typical installation cost	£150 - £250
---------------------------	-------------

Typical yearly saving	£33
-----------------------	-----

Potential rating after completing steps 1 to 4	56 D
--	------

Step 5: Heating controls (thermostatic radiator valves)

Heating controls (TRVs)

Typical installation cost	£220 - £250
---------------------------	-------------

Typical yearly saving	£78
-----------------------	-----

Potential rating after completing steps 1 to 5
--

58 D

Step 6: Replace boiler with new condensing boiler

Typical installation cost	£2,200 - £3,500
---------------------------	-----------------

Typical yearly saving	£558
-----------------------	------

Potential rating after completing steps 1 to 6
--

70 C

Step 7: Double glazed windows

Replace single glazed windows with low-E double glazed windows

Typical installation cost	£4,500 - £6,000
---------------------------	-----------------

Typical yearly saving	£135
-----------------------	------

Potential rating after completing steps 1 to 7
--

73 C

Step 8: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£8,000 - £10,000
---------------------------	------------------

Typical yearly saving	£210
-----------------------	------

Potential rating after completing steps 1 to 8
--

77 C

Advice on making energy saving improvements

Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

- Free energy saving improvements: [Warm Homes Local Grant \(WHLG\)](#)
- Heat pumps and biomass boilers: [Boiler Upgrade Scheme](#)
- Help from your energy supplier: [Energy Company Obligation](#)

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Thorin Creed
Telephone	07770 592 221
Email	thorincreed@outlook.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/019577
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

About this assessment

Assessor's declaration	No related party
Date of assessment	18 August 2026

Date of certificate

18 August 2026

Type of assessment
